

Aqura Wash

Detergent-free cleaning

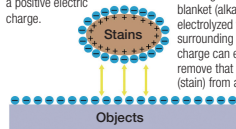

Make drab dresses just like new again without detergent!

- No detergent residue on clothes makes them skin friendly.
- In addition, pollution-free drainage makes this kind of cleaning super environmentally friendly.
- Revive your beautiful dresses, restoring their former luster and making their whites white and their colors vivid.

Most stains have a positive electric charge.

The repulsive force between the atoms of a negatively charged blanket (alkaline-ion electrolyzed water) surrounding a positive charge can easily remove that charge (stain) from an object.

Stuffed animals

A beautiful, clean finish!
Detergent-free cleaning is safe even for kids with atopic allergies, so you can rest easy.
